ROBINHOOD API

<https://algotrading101.com/learn/robinhood-api-guide/>

<https://youtu.be/ZejD9Wkcucqk?si=4f6RWHRic1nA6hTQ>

```
pip install robin_stocks

import robin_stocks.robinhood as rh

# Log in to your Robinhood account
# Replace 'username' and 'password' with your actual login credentials
login = rh.login('your_username', 'your_password')

# Define order details
stock_symbol = 'AAPL'
limit_price = 190.00
quantity = 1 # Specify the quantity of shares you want to buy

# Place a buy order at the limit price
order = rh.order_buy_limit(stock_symbol, quantity, limit_price)

print(order) # Print the order details
```

ALPACA API

(i have used this a few times for crypto, and have an account)

<https://alpaca.markets/broker#build>
