by Algo Investor Inc.

Wall Street's sharks make money off you.

Most money in the market is traded by algos.

Dutch Sailing Companies were created

to mitigate investors' risk.

The Dutch East India Company was among the first corporations to issue stock to their investors.

are traded at a price.

Stocks trade in the NY market, and shares

Corporations issue shares of stock, and the share price times the # of shares issued equals the *market capitalization*.

The market cap is the size of the company.

Some companies are big, some are small.

Bitcoin has a similar structure in market cap.

Bitcoin has 21 million bitcoins (like shares), each worth, say, at \$60,000 USD.

Bitcoin's market cap is $21M \times \$60k = \$1,260 \text{ Billion } (\$1.26T)$

Gold has an estimated market cap of \$17.36T

A \$1,000 dollars x 1,000

= \$1,000,000 or \$1 million dollars

\$1 million dollars X 1,000

= \$1B

 $$1B \times 1,000 = $1 \text{ Trillion dollars}$

Apple Inc (Symbol: AAPL) has a market cap over \$3 Trillion dollars.

If you start a corporation, you can issue shares to raise money.

take advantage of corporate law to grow a your company's money, or Revenue.

If you create myBiz Corp., you can

myBiz Corp's profits after expenses

are called net income.

Consistent Revenue month after month,

Is called MRR - Monthly Recurring Revenue.

If your website, social media-promoted generate \$1M in MRR,

YOU CAN SELL myBiz Corp

for $40 \times MRR$, or \$40M.

This is a real way to become wealthy.

Let's see a few people who got wealthy from their corporation's stock appreciation.

<. Musk, Zuck, bill, Steve, we,

Vlad,Larry,crm, bezos, etc.>

Let's talk about making money with stocks,

options and bonds.

Divide your investment capital into

Long Term and Short term accounts.

Let's quickly review the basics of

what we call the 'Wall St Algo'

Stock prices close at a 4pm NY Time.

A normal chart shows all the closing prices

over time.

Algo investors and traders use

Candlestick charts, as they give more

information: OHLCV

Candlesticks were invented by Japanese rice traders to measure emotion in the markets.

Munihesa Homna found that certain patterns of Candlesticks could imply market reversals, or trends.

Candlesticks are scalable, and can

represent different time periods.

Daily, weekly, 15-minute or 5-minute Candlesticks are common.

Wall Street algos use candlesticks and

volume to create the basics of

Algorithmic Trading.

Each day at market on close ("MOC"),

price levels for the next day are calculated.

or price levels.

This predictive method uses Candlesticks,

and is called Pivots,
